// File: README.md
1 This is a [Next.js](https://nextjs.org) project bootstrapped with [create-
next-app](https://nextjs.org/docs/app/api-reference/cli/create-next-app).
2
3   ## Getting Started
4
5 First, run the development server:
6
7   ```bash
8   npm run dev
9   # or
10  yarn dev
11  # or
12  pnpm dev
13  # or
14  bun dev
15  ```
16
17 Open [http://localhost:3000](http://localhost:3000) with your browser to
see the result.
18
19 You can start editing the page by modifying app/page.tsx. The page auto-
updates as you edit the file.
20
21 This project uses [next/font](https://nextjs.org/docs/app/building-your-
application/optimizing/fonts) to automatically optimize and load [Geist](
https://vercel.com/font), a new font family for Vercel.
22
23   ## Learn More
24
25 To learn more about Next.js, take a look at the following resources:
26
27   - [Next.js Documentation](https://nextjs.org/docs) - learn about
Next.js features and API.
28   - [Learn Next.js](https://nextjs.org/learn) - an interactive Next.js
tutorial.
29
30 You can check out [the Next.js GitHub repository](https://github.com/
vercel/next.js) - your feedback and contributions are welcome!
31
32   ## Deploy on Vercel
33
34 The easiest way to deploy your Next.js app is to use the [Vercel Platform](
https://vercel.com/new?utm_medium=default-
template&filter=next.js&utm_source=create-next-app&utm_campaign=create-next-
app-readme) from the creators of Next.js.
35
36 Check out our [Next.js deployment documentation](https://nextjs.org/docs/
app/building-your-application/deploying) for more details.
37
